Gemini IA

MENTES
MODO IA
EM AÇÃO

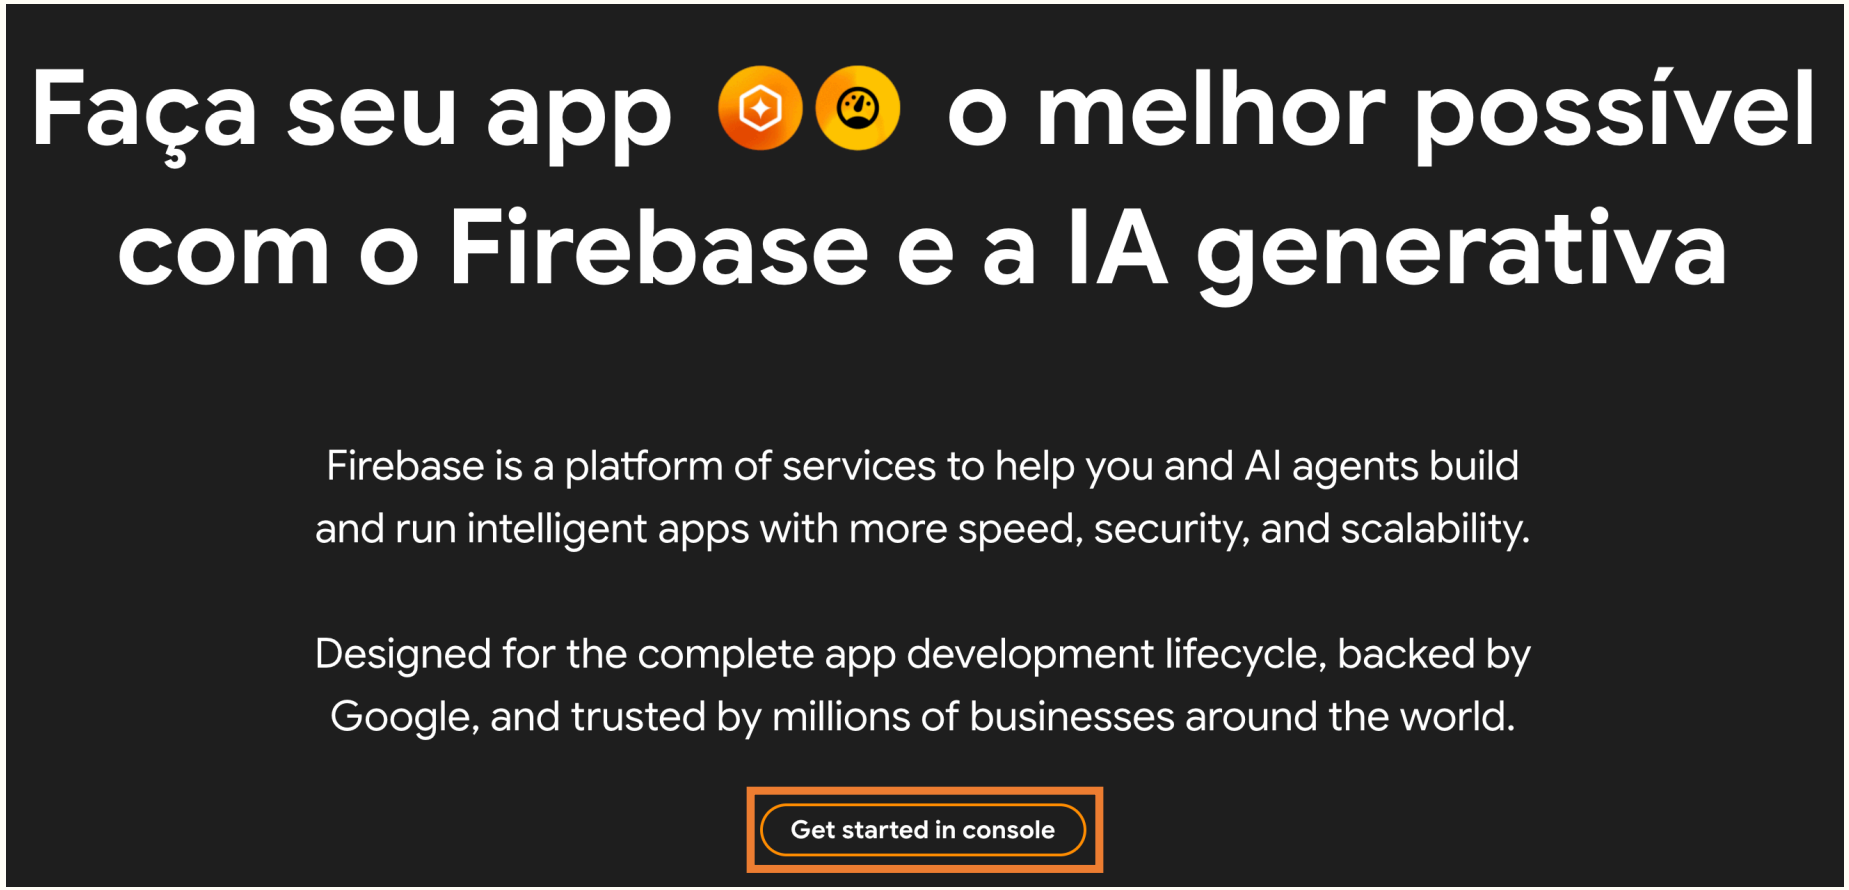

O que é o Firebase?

Plataforma BaaS (Backend-as-a-Server)

- desenvolvida pela Google;
- Pouco trabalho para ter um backend robusto e poder focar no seu app.

Ative a API e clique em “Continuar" em todos os próximos passos.

Vamos ao Código!

```swift
import SwiftUI
import Firebase

@main
struct BolaoCopaApp: App {
    init() {
        let provider = AppCheckDebugProviderFactory()
        AppCheck.setAppCheckProviderFactory(provider)
        FirebaseApp.configure()
    }

    var body: some Scene {
        WindowGroup {
            ContentView()
        }
    }
}
```

HACKA TRUCK Maker Space

Vamos ao Código! View

```swift
import SwiftUI
import FirebaseAI

struct ContentView: View {

    let model = FirebaseAI.firebaseAI(backend: .googleAI()).generativeModel(modelName: "gemini-3.1-flash-lite")

    @State var prompt: String = ""
    @State var iaResponse: String = ""
    @State var isLoading: Bool = false
```

HACKA TRUCK Maker Space

Vamos ao Código! View

```
func sendMessage() {
    let userPrompt = prompt
    prompt = ""
    isLoading = true
    iaResponse = ""

    Task {
        do {
            let response = try await model.generateContent(userPrompt)
            iaResponse = response.text ?? "Sem resposta..."
        } catch {
            iaResponse = "Erro: \(error.localizedDescription)"
        }
        isLoading = false
    }
}
```
